

Assignment 6

Step 1: Create the initial tuple

```
t1 = (10, 20, 30, 40, 30, 50)
```

Step 2: Find the index of number 40

```
index_40 = t1.index(40)
```

```
print("Index of number 40:", index_40)
```

o/p: Index of number 40 : 3

Step 3: Count the number 30

```
count_30 = t1.count(30)
```

```
print("Count of number 30:", count_30)
```

o/p: Count of number 30 : 2

Step 4: Delete the tuple

```
del t1
```
