

## Assignment 2

```
a = int(input("enter a value "))    #input a value
b = int(input("enter b value "))    #input b value
c = int(input("enter c value "))    #input c value
sum = a + b + c                    # sum of 3 values
print("sum is " , sum)              #printing sum of 3 values
average = sum/3                    # average of 3 values
print("average " , average )        #printing average of 3 values
```
